

16W solar panel

Overview

What is a 16 kW solar power system?

This 16 kW solar power system contains the core components you need to go solar, including: This kit features Enphase IQ8 microinverters, which offer greater shade tolerance and more flexible system design options. Unlike string inverter systems, the IQ8s allow you to install panels at different orientations without impacting system performance.

How many solar panels are in a 330W Solar System?

This kit contains (48) 330W panels, which will generate a total of 15,840 watts or 15.84 kW of continuous power. (If you have different energy needs, our design team is happy to size a custom kit for you!) This kit features (48) Enphase IQ8 microinverters, which offer some of the most advanced solar technology available on the market.

Are gogreensolar solar panels right for You?

GoGreenSolar solar panel kits include a complimentary roof layout, installation support and permit approval guarantees so you don't have to figure it out all on your own. If you're handy with tools, love learning new skills, or enjoy managing and completing projects, DIY solar installation could be ideal for you.

Is DIY solar installation right for You?

If you're handy with tools, love learning new skills, or enjoy managing and completing projects, DIY solar installation could be ideal for you. Many DIYers take satisfaction in the process and are proud of the results! Going DIY can save you \$10,000 or more, depending on system size.
