

28V lithium battery pack

Overview

What is a 28 volt lithium ion battery pack?

28-volt Lithium-Ion battery packs power the entire Milwaukee M28 System of power tools. The V28 Lithium-Ion battery pack offers up to twice the run-time of an 18-volt NiCd or NiMH pack and is actually lighter than 18-volt NiCd and NiMH packs! Lithium-Ion technology allows consistent fade-free power meaning the first cut is as powerful as the last.

What is a M28 lithium-ion battery pack?

The M28™ Lithium-Ion Battery Pack is built to handle high-torque applications on the jobsite with ease. Managed by Milwaukee's exclusive REDLINK™ Intelligence, the battery features overload protection to prevent you from damaging your cordless power tools in heavy-duty situations, while the discharge protection prevents cell damage.

Why should I use a high voltage lithium ion battery pack?

The temperature management system and individual cell monitoring help maximize battery life. Use this high voltage lithium-ion battery pack to power your Milwaukee M28™ and V28™ cordless power tools.
