

# **ASEAN 2025 Energy Storage Power Station Project**

## Overview

---

How can the ASEAN Power Grid facilitate investments in renewables?

To facilitate investments in renewables in ASEAN, it is critical to overcoming the barriers in renewable energy legislation, energy governance, and business environment. 28 Cooperation through the ASEAN Power Grid brings economic benefits to the region as a whole, and thus improves the affordability for energy transition.

How much energy storage will Singapore have by 2025?

With just one project, EMA has achieved and exceeded Singapore's deployment target of 200MWh of energy storage by 2025. The target was set as part of the EMA programme, Accelerating Energy Storage Access for Singapore (ACCESS), through which the EOI solicitation was held.

How will ASEAN accelerate energy transition efforts?

The ASEAN Member States will accelerate energy transition efforts by setting a more aggressive energy intensity reduction target of 32% by 2025 based on 2005 level.

What will ASEAN's energy consumption be in 2025?

In 2025, the region's TPES will reach 874 MTOE. In the same period, ASEAN's total final energy consumption (TFEC) is forecasted to reach 518 MTOE in 2025 and 922 MTOE in 2040 under baseline scenario. By 2025, the region's TFEC is projected to be 474 MTOE in the ASEAN Target Scenario (ATS) and 450 MTOE in the ASEAN Progressive Scenario (APS).

How much investment does ASEAN need for generation infrastructure?

Across scenarios, generation infrastructure will require a cumulative investment equivalent to 29.6%–44.6% of ASEAN's 2018 GDP (Gross Domestic Product). The investment requirements for the expansion plan, however, are unevenly distributed across countries, especially with the ambition to achieve

a carbon-neutral power sector.

Does ASEAN have technology options to decarbonize power sector?

Faced with energy transition objectives, the ten countries of the Association of Southeast Asian Nations (ASEAN) have technology options to decarbonize power sector. This study investigates the hypothetical decarbonization pathways for ASEAN's power sector.

## ASEAN 2025 Energy Storage Power Station Project

---

### [Southeast Asia's biggest BESS officially opened in ...](#)

Singapore has surpassed its 2025 energy storage deployment target three years early, with the official opening of the biggest battery storage ...

### ASEAN Clean Energy and Storage Market Surges in Early 2025

From January to May 2025, Southeast Asia has witnessed a surge in clean energy developments, with large-scale solar, wind, and battery storage projects gaining momentum across the region.

### ASEAN Resilient Grid Capacity Building Programme Launches ...

Cheng identified pumped storage as a mature and economically viable flexible regulation resource, crucial for clean energy-dominated power systems. This training aims to ...

### [ASEAN to Push Utilisation of Storage Technologies](#)

ASEAN Member States (AMS) need to step up their game on energy storage development. As the 6th ASEAN Energy Outlook foretells, ASEAN's Total ...

### [Philippines DOE launches delayed solar-plus-storage ...](#)

The Philippines's first hybrid solar-storage plant, completed in 2022 with developer ACEN adding a 60MW/120MWh BESS to a 120MW solar ...
