

ASEAN solar cell prices

Overview

What's going on with solar cell tariffs in Southeast Asia?

Jason Doiy via Getty Images The U.S. Commerce Department on Monday announced its final determinations in an antidumping and countervailing duty investigation into solar cell imports from four Southeast Asian countries, setting individual tariff rates of more than 3,400%.

Why is China Shipping solar products through Southeast Asian countries?

The U.S. Commerce Department found that some Chinese producers have been shipping solar products through Southeast Asian countries to avoid paying tariffs imposed in the past. The department has slapped high tariffs on four Southeast Asian countries: Malaysia, Cambodia, Thailand, and Vietnam.

Will US solar import tariffs hurt Southeast Asian producers?

BEIJING, Dec 2 (Reuters) - A new round of U.S. solar panel import tariffs on Southeast Asian producers is expected to raise consumer prices and cut into producer profit margins, but was largely anticipated by industry, analysts said.

What's going on with solar imports from Southeast Asia?

The trade tensions on solar imports from Southeast Asia aren't new. After the over-300% tariff on Chinese solar products reduced US solar imports from China to nearly zero, the country seemingly ramped up manufacturing capacity in these four countries to get their products into the US.

Which countries have imposed tariffs on solar cells?

The U.S. Dept. of Commerce today released its final tariff amounts on solar cells (whether or not assembled into modules) from Cambodia, Malaysia, Thailand and Vietnam.

Are Southeast Asian solar imports harming the domestic industry?

The ITC did preliminarily decide that the Southeast Asian solar imports were harming the domestic industry, and Commerce revealed its preliminary CVD amounts in September and its preliminary AD amounts in November.
