

# Bangladesh s latest new energy storage policy

## Overview

---

How much electricity does Bangladesh generate from renewable sources?

The policy aims to generate 20% of total electricity from renewable sources by 2030, equivalent to 6,145 MW, and 30% by 2041, reaching 17,470 MW. Bangladesh currently generates only 5.6% of its total electricity demand from renewable sources, with approximately 1,563 MW of grid and non-grid renewable energy capacity as of 2025.

Will European Union fund energy storage in Bangladesh?

Bangladesh government and potential investors into energy storage were handed European Union-funded roadmap for the technology's development.

How much electricity can Bangladesh generate from floating solar photovoltaics?

Bangladesh has immense potential to generate approximately 11,000 megawatts peak (11GWp) of electricity from floating solar photovoltaics according to International Finance Corporation screening of 323 water bodies larger than 25 acres.

How can Bangladesh achieve regional competitiveness?

Bangladesh can leverage regional experiences and best practices, particularly from India's large-scale solar programs and Sri Lanka's diversified renewable energy portfolio. The policy framework acknowledges these gaps and sets ambitious targets to achieve regional competitiveness within the next decade.

Does Bangladesh have a P2P energy trading platform?

Bangladesh already hosts successful P2P energy trading platforms, with ME SOLshare operating 48,000 PV capacity (Wp) through their SOLbazaar IoT-driven trading platform. The platform consists of SOLbox (bidirectional DC meter), SOLapp, and SOLweb components that facilitate energy trading and

mobile money payments.
