

Buy an outdoor power bank to charge at work

Overview

Which power bank is best for outdoor use?

If you plan to use your power bank for outdoor applications such as hunting, backpacking, and off-roading, we recommend one built to withstand rugged use. On this list, the Nestout 15,000mAh Outdoor Battery, Dark Energy Poseidon Pro 10200, and Wuben Lightok X3 Owl EDC Flashlight are all rated to withstand getting wet.

How much does a power bank cost?

For this range of power banks, you can pay anywhere from \$20 to \$160. Power banks with a capacity rating of 20,000 mAh or larger are the most versatile of the group. They offer the greatest array of inputs and outputs as they are designed to charge multiple devices at once or charge a single device multiple times.

Why should you choose a portable charger power bank?

Consider dual built-in cables, digital displays, airline compliance, and pass-through charging for maximum convenience. The Portable Charger Power Bank 40,800mAh stands as the ultimate charging solution for power users who demand maximum capacity without compromising on convenience.

How to choose a power bank?

Verify the power bank's capacity matches your devices' requirements. High-demand scenarios like laptop charging need 65W+ PD support, while smartphones typically require 18-30W for peak fast charging performance. Built-in cables eliminate cable management hassles while streamlining your charging setup for maximum portability.

Which power banks have pass-through charging?

Many power banks on this list have pass-through charging, including our top pick the Nestout 15,000mAh Outdoor Battery. Durability is a major factor in

how brands design products for our use and abuse. Every power bank on this list passed our standardized drop-testing onto concrete from 2 feet.

Does a power bank have wireless charging?

Some larger power banks are equipped with wireless charging capability. On this list, both the BioLite Charge 100 Max and Goal Zero Sherpa 100 PD come with a wireless charging pad that can deliver up to 15W of power to compatible devices. In general, wireless charging from a power bank will be slower than using a cable.
