

# **Do solar panels cost a lot of money**

## Overview

---

### Are solar panels worth it?

The federal solar tax credit may reduce the net cost to \$20,552, and local incentives can further lower the cost. You can determine whether solar panels are worth it for your home by considering various factors, such as local incentives and policies, your electric bill, and how you finance the system.

### How much do solar panels cost?

The price of solar panels changes depending on where you live, but the average for installation is just under \$29,000 or \$2.75 per watt. On the high end, we talked to a solar customer in Hawaii who spent \$100,000 going solar. Dion in Nevada said their 10-kW system cost about \$20,000, which is about the national average price for a 7-kW system.

### How much money do solar panels save?

How much money you save varies on several factors, including your location, current energy usage, the size of your solar panel system, and, most importantly, the price you pay for electricity. For example, if you currently pay \$150 a month for electricity, you'll save about \$83,000 on bills over the next three decades.

### How much does a home solar system cost?

According to studies by the U.S. Department of Energy, the all-in cost of a home solar panel system is between \$2.74 to \$3.30 per watt. <sup>1,2,12</sup> This figure includes the solar panels, the installation, and other expenses. Using these numbers, an average-sized 8-kilowatt residential solar system would cost between \$21,900 – \$26,400.

### Do solar panels make money?

States with net metering and a Solar Renewable Energy Credit, or SREC, market even make it possible to earn money by selling your excess solar

energy to the power grid or utility companies. Solar panels will generate more electricity in states that receive more peak sunlight hours. Are solar panels worth it?

.

Are solar installations cheap?

Solar installations aren't cheap, but the actual equipment is a relatively small part of the total cost. It's only 35% of your total installation cost, according to the US Department of Energy. Soft costs, also known as the hidden costs of installing solar, are nonhardware costs, and they make up 65% of your total solar costs, according to the DOE.
