

Fiji Home Solar System Application

Overview

What is the Fiji solar home system?

The Fiji solar home system (SHS) program provides electricity, primarily for lighting, for remote households located in rural areas where supplying electricity via the grid is not feasible.

What is the solar home PV program in Fiji?

The solar home PV program in Fiji – A successful RESCO approach?

The Fiji solar home system (SHS) program provides electricity, primarily for lighting, for remote households located in rural areas where supplying electricity via the grid is not feasible.

Why do we need solar power in Fiji?

By harnessing the abundant Fijian sunshine, we aim to power our pristine Fijian paradise with clean renewable solar energy for generations to come, thereby reducing Fiji's reliance on expensive and polluting diesel generation for electricity.

Why do organisations in Fiji switch to solar energy?

The answer is simple. Reduce costs, maintain control and look after Fiji. Organisations in Fiji choose to go solar for their energy for a variety of reasons, including financial, environmental, and strategic benefits. One of the primary reasons organisations in Fiji switch to solar energy is to save money on their energy bills.

How successful is the Fiji SHS program?

The Fiji SHS program is successful at the broadest level in that the program's objective of using solar home systems to provide electricity for lighting to rural households is being achieved and there is a high reported level of user satisfaction and improvements in the quality of life of SHS users.
