Overview

Enemalta plc is the only . It provides energy services in the Maltese Islands and is entrusted with the distribution of electricity, and the development of the national electricity distribution network. It employs approximately 600 people. Enemalta operates the emergency plants of the (444.

What is energy in Malta?

Energy in Malta describes energy production, consumption and import in Malta. Malta has no domestic resource of fossil fuels and no gas distribution network, and relies overwhelmingly on imports of fossil fuels and electricity to cover its energy needs.

How many electricity plants are there in Malta?

Malta has four electricity plants operational and the total combined nominal installed capacity is 537.8 MW. The Malta–Sicily Interconnector, which has been in operation since April 2015, allows for an electricity link between the Maltese Islands and the Italian electricity market has bidirectional flow capacity of 200 MW.

Is Enemalta a Maltese company?

Enemalta plc is the only Maltese energy company. It provides energy services in the Maltese Islands and is entrusted with the distribution of electricity, and the development of the national electricity distribution network. It employs approximately 600 people.

How many employees does Enemalta have?

It employs approximately 600 people. Enemalta operates the emergency plants of the Delimara Power Station (444 MW, started up in 1992) and coordinates the dispatch of energy from the various plants. The Marsa power plant (267 MW, commissioning in 1966) was shut down in 2014 and totally demolished two years later.

Why is Malta connected to the European power grid?

Since 2015, the Malta–Sicily interconnector allows Malta to be connected to the European power grid and import a significant share of its electricity. At 4.9%, Malta had the lowest share of renewables as part of gross inland energy consumption in the EU in 2017.

Does Enemalta have a power plant?

A power plant in Floriana (1896 to 1960), a power plant in Corradino (1939 to 1992) and Station A in Marsa (1953 to 1993) were operated by Enemalta until their shutdown. Since Malta does not have its own resources, Enemalta relies entirely on imported fuels.
