

How much does it cost to install photovoltaic panels on Spanish roofs

Overview

As of 2024, the average cost of solar panels in Spain ranges between €1,000 to €2,500 per installed kilowatt (kW). This means that for a typical home system of around 5 kW, you could expect to pay between €5,000 to €12,500 before any government incentives. Are solar panels a cheaper alternative source for Spanish homes?

The advances produced in the development of renewable energies have provoked significant decreases in the cost of solar panels, turning solar energy into a cheaper alternative source for Spanish homes. Therefore, talking about prices implies taking into account materials, labour and legal procedures.

How much does a photovoltaic system cost?

The result will correspond to the number of years you need for the investment to be returned. Up until now, the costs of a photovoltaic system at home have been specified. But let's talk about the prices of the panels in question, which are calculated in terms of cost per watt, usually between 600 and 800 euros per square metre.

Why should you install a photovoltaic system in your home?

Reducing electricity costs has been the biggest motivation to install a photovoltaic system in homes, not to mention the positive impact on the environment. By 2026, nearly 29.3 gigawatts will have been installed in Spain, making Spain the second country in Europe with the most solar power.

How profitable are solar panels?

The profitability of solar panels is determined by the following factors: With an average of 2,500 hours of sunshine per year, Spain is proclaimed as one of the sunniest geographical areas in Europe, surpassing neighbouring countries such as France and Portugal.

How many kilowatts do solar panels produce a year?

There is sadly no singular answer to this question. However estimates suggest a family living in a 120 sqm property with four members with their own independent solar panel installation that features south facing solar panels could produce on average around 5,843-kilowatt hours per year.

How to install a photovoltaic system?

To do this, it is important to follow these guidelines: Hire an authorised certified installer. Register the photovoltaic system through the corresponding Ministry of Industry. Validate the system by Industry. If documentation is missing, it will be requested in this step. Sign the contract for the compensation of surpluses.
