

Indian PV module prices

Overview

India's solar PV module prices range from ₹12-22 per watt, influenced by technology, brand, and procurement scale. Monocrystalline PERC modules dominate with ₹14-20 per watt, led by Vikram Solar (₹16.5-18.0/W) and Adani Solar (₹16.0-17.5/W). What is India solar PV module market?

*Definition: India solar PV module market refers to the market for solar photovoltaic modules in India. As renewable energy generation emerges as a major focus area for the country, the demand for solar PV modules has been growing rapidly.

Why are solar PV modules important in India?

Solar PV modules are a key component for setting up solar power plants and rooftop solar installations across industries, commercial establishments and households. Key players in India are manufacturing solar PV modules to cater to this growing domestic demand. Yash Doshi is a Senior Management Consultant.

What is the solar panel price in India government subsidy?

The solar panel price in India government subsidy is a game-changer for individuals and businesses looking to switch to solar energy. Under the Rooftop Solar Scheme by the Ministry of New and Renewable Energy (MNRE), the Indian government provides subsidies ranging from 20% to 40% based on system capacity. 1.

Are photovoltaic panels a good investment for India?

Solar energy has become a cornerstone of India's renewable energy drive, and photovoltaic (PV) panels play a critical role in this transformation. As more people embrace green energy, understanding photovoltaic panels—their price, benefits, and challenges—has become essential for making informed decisions.

Will India's domestic solar market help Vega Solar?

(AP Photo/Manish Swarup) India's domestic solar market has already helped Hyderabad-based Vega Solar shift its customer base for off-grid solar modules for RVs, electric fences and other uses to customers in India in the years since the COVID-19 pandemic, said Vinay Keesara, a company director.

How has India's solar module manufacturing capacity changed over the year 2025?

(AP Photo/Manish Swarup) According to India's renewable energy ministry, the country's solar module manufacturing capacity more than doubled to 74 gigawatts over the fiscal year ending March 2025. Solar cell manufacturing tripled in the same period, from 9 gigawatts to 25 gigawatts.

Indian PV module prices

Photovoltaic Panels Price in India (2025)

As of 2025, the price of solar panels in India ranges from INR25 to INR50 per watt, making solar energy more affordable for households and businesses. For instance, a 1kW solar system, ideal for ...
