

# **Lithium battery plus 3kW inverter**

## Overview

---

Can a 3KW inverter work with a battery?

Plus, this inverter works with or without batteries, so you can create a power system tailored to your needs. Combine this 3kW inverter and charger with your PV array, stable grid connection, or favorite BigBattery battery to equip your home or camper van with a safe, reliable power system.

What voltages does a 3KW inverter support?

Battery System: 24V, compatible with various battery types. Single MPPT: 99.9% efficiency with a max current of 22A. Multiple Output Voltages: Supports 208, 220, 230, and 240Vac for versatile applications. This 3KW inverter supports a wide PV input voltage range of up to 450Vdc, making it ideal for regions with unstable grids.

How many charging modes does a 3KW inverter have?

This 3KW inverter includes four charging modes: solar only, grid priority, solar priority, and hybrid grid/PV charging, giving users full control over their energy consumption and charging preferences.

Will I be charged if I buy a 3000W solar inverter?

You won't be charged until the item ships. A revolutionary all-in-one solar inverter: the 3000W solar inverter has a built-in 60A MPPT charge controller and operates from 24V to 110V or 120V AC. With an efficiency of up to 99.9%, the solar charge module uses the most recent optimized MPPT tracking technology.

What is a bettsun 3KW inverter?

The Bettsun 3KW inverter offers four output voltage levels—208, 220, 230, and 240 Vac—making it adaptable to different power grid standards across various regions. Equipped with a single MPPT that reaches up to 99.9% efficiency, this inverter handles up to 22A of current, optimizing solar energy

production for maximum efficiency.

Can a solar inverter be used with a battery?

It is suitable for a maximum circuit voltage of 102VDC. The inverter can be used with batteries, but can also work without. The integrated solar charger optimizes the charging and discharging of the battery. Priorities can be assigned, where for example charging from the grid can be preferred over charging from the PV installation.
