

## **New energy base stations installed 6 9MWh**

## Overview

---

How many electric vehicles can a 9mwh power system charge?

With a capacity of 9MWh, it can charge 150 electric vehicles or power a German household for six years. The system supports both centralized and string PCS (Power Conversion System) architectures, ensuring wide AC-side compatibility and cost savings.

Is CATL Tener energy storage a Bess system?

"CATL has always been at the forefront of the energy transition," said Amanda Xu, CTO ESS & President of ESS Europe CATL. "To meet the expectation of a BESS system that has high energy density, small footprint, simpler AC-side configuration, and flexible deployment, we bring the latest CATL TENER energy storage solution.

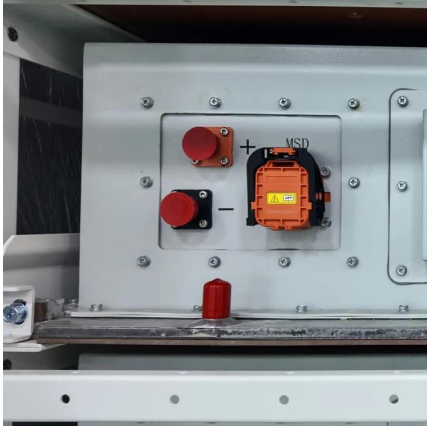

How many projects have CATL ESS been deployed in 2024?

By the end of November 2024, CATL's ESS products were deployed in over 1,700 projects across the world, spanning all climate zones and operating environments.
