

# **Romania energy storage base station project bidding**

## Overview

---

Will Romania reopen a call to support battery storage projects?

Romania's Ministry of Energy has reopened its call to support projects of battery storage for renewable energy integration, seeking at least 240 MW and 480 MWh of resources. The original call, which referred to at least 620 MWh, was expected to see projects selected by the end of 2023, according to reports.

How much will Romania spend on a battery energy storage project?

To achieve this goal, the Romanian government will conduct both tenders through competitive bidding. A total of €79.6 million is allocated for the battery energy storage project. €199 million will be spent on related manufacturing capacity. Of this amount, €149.25 million will be used for new cell production, assembly and recycling facilities.

Will Romania re-launch a battery energy storage tender?

On 8 February, the Ministry of Energy of Romania announced the re-launch of its tender for battery energy storage projects and investments in the manufacturing sector for the production of energy storage equipment and solar panels.

Does Romania have a grant program for battery energy storage systems?

The Romanian Ministry of Energy has launched a grant program for battery energy storage systems developed in conjunction with existing renewable energy facilities – wind, solar, or hydro. Romania has launched a new subsidy scheme for behind-the-meter battery energy storage systems to the tune of EUR 150 million (\$158 million).

Will pnrr help Romania meet its energy needs?

Earlier in November, the Ministry of Energy allocated EUR 30 million in non-reimbursable support via PNRR for 791.48 MWh of battery energy storage.

Once delivered, the five projects will see Romania meet 20% of its storage needs, according to the ministry's announcement.

Will NRRP support Romania's battery and solar photovoltaic manufacturing sectors?

The Ministry of Energy has recently announced a call for proposals to support Romania's battery and solar photovoltaic (PV) manufacturing sectors, worth €199 million and funded through the NRRP.
