

Single pack lithium battery automation complete equipment

Overview

What are the technical parameters of intelligent battery pack?

Intelligent battery pack finished product handling and packaging system. 3: Technical Parameters: Total production line length: 16 meters. Production capacity: Up to X battery packs per hour (customizable). Precision level: $\pm 0.1\text{mm}$ positioning accuracy. Processing efficiency: 99.5% uptime.

How KUKA robots are used in the production of lithium-ion battery cells?

In the production of lithium-ion battery cells, special high-precision machines are used for individual production steps. KUKA robots can take over certain key processes such as stacking, loading and unloading, or formation and aging of cells.

How are lithium-ion cells assembled?

In this process step, lithium-ion cells are assembled into modules and connected in series or in parallel. KUKA supplies the turnkey system and keeps an eye on everything: In addition to optimal handling and welding solutions, adhesive bonding, pressing and electrical and thermal contacting are relevant key processes here.

Single pack lithium battery automation complete equipment

Direct Supply Complete Assembly Line for Lithium Battery Pack ...

Battery Cell Sorting Equipment Internal Resistance Tester: Measure battery internal resistance through specific frequency AC signals, Select batteries with similar internal resistance, Ensure ...

18650 Battery Pack Assembly Machine, 18650 Battery Sorter

18650 Battery Pack Assembly Machine, 18650 battery sorter With the wide application of lithium batteries in the field of new energy, automation equipment has become one of the core ...
