

Sino-European Solar Photovoltaic Module Company

Overview

How many sinovoltaics Europe Solar factory sites are there?

The report tracks the announced factory location, size, owner, and planned capacity, as well as sites that have been closed, or where capacity is on hold. There are 125 factory sites listed in the Sinovoltaics Europe Solar Supply Chain Map for 1Q2025, which is available as a free download.

Where is sinovoltaics' new supply chain map based?

Sinovoltaics, a Hong Kong-based technical compliance and quality assurance company, has released its latest PV module supply chain map for Europe and Turkey, plus Egypt and Kazakhstan. The report tracks the announced factory location, size, owner, and planned capacity, as well as sites that have been closed, or where capacity is on hold.

What is the sinovoltaics supply chain map – European for Q2 2024?

The Sinovoltaics Supply Chain Map (SSCM) – European for Q2 2024 has a large information update, according to the analysts. Sinovoltaics uses nameplate capacity figures and publicly available information. The analysts noted that Europe, Turkey, and Kazakhstan currently have 22 GW of module production capacity.

How often does sinovoltaics publish a region-specific solar supply chain map?

Every four months, Sinovoltaics publishes region-specific solar supply chain maps for North America, Europe, Southeast Asia, and India, documenting the published plans of manufacturers operating in each region. It also publishes an annual transformer manufacturing map for Mainland China.

What services does sinovoltaics offer?

Sinovoltaics' services include quality assurance inspections, factory audits, Environmental, Social, and Governance (ESG) reports, and traceability audits for utility solar developers and investors.

How much capacity does sinovoltaics have?

Sinovoltaics uses nameplate capacity figures and publicly available information. The analysts noted that Europe, Turkey, and Kazakhstan currently have 22 GW of module production capacity. They said that “various parties” have also announced an additional 38 GW of module production capacity for the period between 2027 and 2030.
