

# **The cost of solar photovoltaic panel assembly**

## Overview

---

The average cost is expected to fall between \$24,000 and \$36,000. This range can vary depending on your location, the size of your system, and the specific installer you choose, so it's smart to request a personalized quote to get the most accurate estimate. How much does a solar panel installation cost?

Expect to spend between \$1,000 to \$2,000 depending on system size. The average cost of solar panel installation in the U.S. usually ranges from \$10,000 to \$25,000 before applying any incentives or rebates. Factors that impact this cost include panel type, roof structure, local labor rates, and permit fees.

How much does a home solar system cost?

According to studies by the U.S. Department of Energy, the all-in cost of a home solar panel system is between \$2.74 to \$3.30 per watt. <sup>1,2,12</sup> This figure includes the solar panels, the installation, and other expenses. Using these numbers, an average-sized 8-kilowatt residential solar system would cost between \$21,900 – \$26,400.

How much does a 6 kW solar system cost?

Factors that impact this cost include panel type, roof structure, local labor rates, and permit fees. On average, homeowners pay between \$2.50 to \$3.50 per watt installed. For a typical 6 kW system, this comes out to approximately \$15,000 to \$21,000.

How much does a solar energy project cost?

Always ask your installer for a detailed quote to avoid surprises. A large-scale solar energy project cost can run over \$100,000. These projects involve land prep, panel procurement, storage systems, and labor—but benefit from commercial tax credits and long-term ROI.

How much does a 12 kW solar panel cost?

The average cost of a 12 kW solar panel installation on EnergySage is \$20,754 after the federal tax credit. You'll probably save anywhere from \$34,000-\$120,000 over 25 years by going solar. Solar panels are just 12% of the total cost of a solar panel installation.

How much does a solar system cost per watt?

As of publishing, the average cost per watt is \$2.84. Most solar companies set the price according to the solar system's wattage. A solar installation's "cost per watt" is a little like the "price per square foot" when you buy a house. It helps compare the value of solar energy systems in different sizes.
