

# **Turkmenistan outdoor signal base station**

## Overview

---

The Turkmenistan Tower (: «Türkmenistan» teleradio merkezi) is a communications and observation in , . It was completed in 2011. At 211 metres (692 ft), the tower is the tallest s.

Construction began in 2008 by Turkish company . It was completed on October 17, 2011, when held the official opening ceremony. .

• • • • .

What is the tallest tower in Turkmenistan?

The Turkmenistan Tower (Turkmen: «Türkmenistan» teleradio merkezi) is a communications and observation tower in Ashgabat, Turkmenistan. It was completed in 2011. At 211 metres (692 ft), the tower is the tallest structure in Turkmenistan. Construction began in 2008 by Turkish company Polimeks. [citation needed].

How can I see the location of a mapped base station?

The map opens from left side main menu. In the maps tab you can see the location of already mapped base stations. The application will automatically only show the base stations of the current network being used (LTE in the picture). The location of base stations can also be viewed from the Cellmapper webmap.

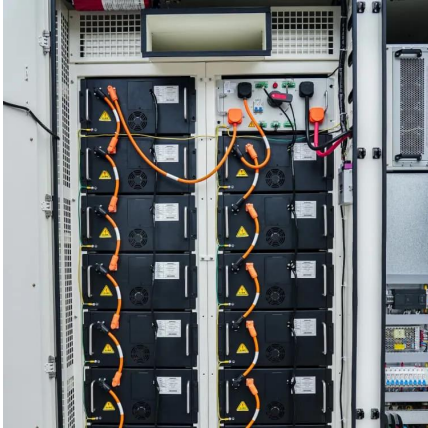

How many kilometers can a base station cover?

The application can show that a base station can cover areas up to a hundred kilometers. These errors can be created if the network data collected by the application has great resemblance with some other base station or if the phone has calculated incorrect GPS-data.

## Turkmenistan outdoor signal base station
